MASUDUR SADIK RIFAT

COMPUTER SCIENCE & ENGINEERING | DATA, AI & CREATIVE MEDIA

Dhaka, Bangladesh | 01892408606 | rsadik298@gmail.com

LinkedIn | GitHub | Portfolio & Creative Work

Profile

Final-year Computer Science and Engineering student with an AI internship, undergraduate research in environmental data analysis and forecasting, and project-based brand video editing experience. Interested in applied AI, data analytics, operations and creative media; comfortable with Python, Excel and technical problem-solving.

Education

BRAC University — BSc in Computer Science and Engineering Expected Dec 2026

National Ideal College, Dhaka — Higher Secondary Certificate (HSC)

National Ideal College, Dhaka — Secondary School Certificate (SSC)

Experience

AI Intern — FlyRank AI Remote

- Participated in an AI-focused remote internship involving exposure to applied AI concepts, technical tasks and structured problem-solving.
- Explored AI-related workflows and gained experience working in a remote, technology-focused learning environment.

Brand Content Creation & Video Editing Project-based / Freelance

- Created and edited video content for multiple brands, shaping footage into audience-facing creative material.
- Worked on brand-oriented content with attention to visual storytelling, presentation and editing; samples available through the portfolio.

Research Experience

Undergraduate Thesis — Spatio-Temporal Fusion and Dynamic GNNs for Pollution Source Attribution Completed Oct 2026

- Researched pollution-source attribution using Sentinel-5P satellite observations, meteorological variables, and sparse environmental sensor data.
- Explored Graph Neural Networks (GNNs), spatio-temporal data fusion, and transfer learning to model spatial and temporal relationships in environmental data.

Projects

DanPotro — Donation Tracker Laravel, MySQL

- Database-backed donation tracking project organizing user, campaign and donation information; repository describes campaign management and donation-history workflows.

Poralekha Planner — Student Planning App JavaScript

- Student planning application with documented workflows for managing subjects, exam schedules, academic tasks and calendar organisation.

Student Registration System Assembly

- Assembly-language academic project modeling student registration workflows, demonstrating lower-level programming and structured data handling.

Courses & Professional Development

Data Science coursework: GCI World (Matsuo–Iwasawa Laboratory)

AI Fluency coursework: Anthropic

Technical Skills

Programming & Data: Python, C++, Assembly Language, Excel

Visualization & Tools: Matplotlib, Seaborn, Jupyter Notebook, Git, GitHub, Docker, Streamlit, Postman

Development & Databases: FastAPI, REST APIs, MySQL, MongoDB, React.js, Node.js, Express.js, Laravel

Other Technical Tools: VS Code, Wireshark, Cisco Packet Tracer, emu8086, UltraViewer
